

# PLx1.4VV

Item No: 500000020114

The PLx1.4VV optical expander increases the focal length of Vista Vision Format PL mount lenses by a factor of 1.4x.

It allows the use on large cameras up to 47 mm sensor diameter and supports a maximum aperture of T-Stop 2.0.

The PLx1.4VV is characterized by a robust and durable mechanical design with stainless steel PL mounts and anodized aluminum as well as a decorative surface outside and flair minimized surfaces inside.

It features high-index, low-dispersion glass to ensure the highest possible resolution and contrast with minimal optical degradation.

The adapter is designed to mount to most digital cameras with a native PL mount.

**The UMS system is not usable with this expander.**

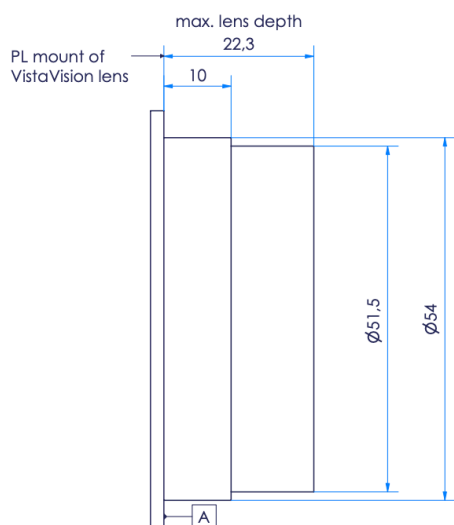

The PLx1.4VV is incompatible with mirror cameras but can be used with most of the S35 PL lenses.

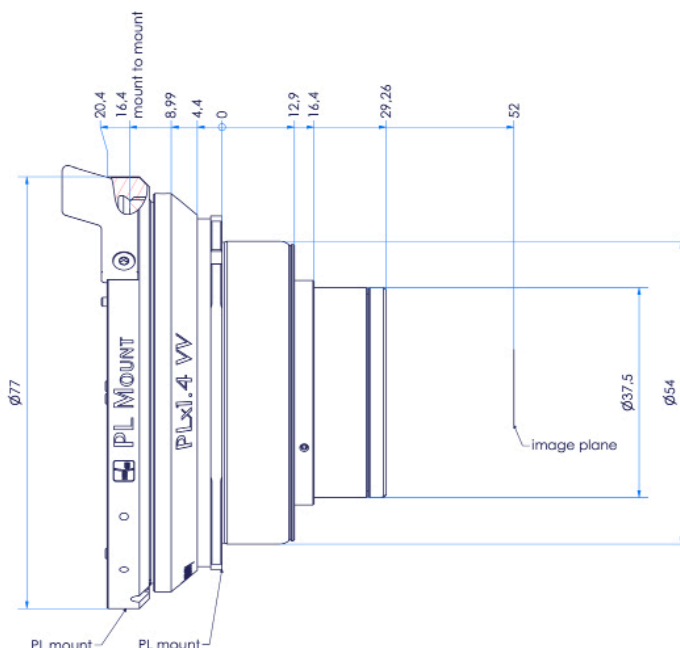

## TECHNICAL DATA

Max. Image Diameter (mm)	47
Magnification	1.4
Max. Input T-Stop	2.0
Light Drop (Stops)	1.0
Lens Mount	PL Standard

Camera Mount	PL Mount
Diameter (mm)	77.0
Length (mm) PL to PL	16.4
Weight (kg)	0.5

III. 1: max. measurements of input lens

III. 2: dimensional drawing
